OIL AND GAS TALK

The well of the Overland company on the Folk farm will be shot today. It is predicted that this well will be good for 75 barrels a day.

The Maxville company has succeeded in straightening their hole on the Woods farm near Maxville, and are progressing nicely with the drilling.

The Crossenville company drilled in a dry hole Monday, their first dry experience. This company has five or six good producing wells.

The Hook-Hocking No. 1 is down 1700 feet and drilling has started on No. 2. Both are in Hocking county, No. 1 on the Dickens farm and No. 2 on the Huston farm.

The recent heavy rains have temporarily reduced the mud roads in the oil fields to an almost impassable condition, greatly interfering with the work of getting supplies to the wells.

The exact amount of money coming into the companies operating in the Bremen field is \$3871.25 a day. Thus a new well to the Clinton in that territory is paid for every second day, the average cost of a well being about \$7550.

Junction City will soon be a veritable "Derrick City." Rigs are springing up on almost every vacant town lot in the corporation, some of them are so close together that the drillers can almost shake hands without leaving their own derrick floor.

The Jack Pot Oil and Gas company operating in Starr township, Hocking county, have their derrick up on the Gray farm. Drilling will begin in a short time. Oil men think that some surprises of a pleasant nature are in store for the operators in this township. Here's hoping that they will not be disappointed.

(Pomeroy Democrat.)

The Rutland Mutual Oil & Gas Company has made a big gas strike in the heart of Rutland village, and according to word that come from there Wednesday morning, they have struck a bonanza, which is bound to stimulate oil and gas development in Meigs county. They had encountered gas for several days in their drilling, and last week it was estimated that they had a sufficient pressure to make the well a paying gasser, but the drill kept pounding away, and Tuesday, at a depth of 700 feet, in the "Big Injun" sand a terrific pressure of gas was discovered, enough, it is estimated, to supply a score of towns like Rutland.

The drill at once stopped, and the officers of the company notified, and they are expected to arrive at Rutland some time Wednesday, when it will be decided whether to stop the drill, or go deeper, in the hope of finding oil or developing a still greater pressure.

Negotiations for the purchase of the oil well on the T. D. Woods farm which has been under consideration for the past week is "all off." The Springfield Co. at the last moment refused to deal their oil rights in this territory. The disposition of the well is at the present time in doubt.

The long string of casing has just been put in on the Hartough well, and will be drilled in a few days.

The well on the David Wylie farm is down about 1600 feet. The work is moving along nicely.

The Columbus Co. put up their short string of casing on the Kriun well, Saturday. Work is moving along rapidly.

The Weitzel well will be ready for the long string of casing in the near future. This well is being drilled by the Springfield Co.

The Hartough well in Perry township was cased to the depth of about 2000 feet last week and drilling was again begun toward the sand. The people here as well as the company hopes for oil or gas in great quantities. Should this be a good one a vast amount of territory will be developed soon in this locality.

The Standard struck off a few cents from the price of crude oil again last week.

At \$1.63 a barrel, the product of the Bremen field makes a daily revenue of \$3,871.25.

CARL LUTZ DIED MONDAY

It is with much regret that we chronicle the death of young Carl Lutz, son of Mr. and Mrs. Henry Lutz, dairyman. He had not been well for several months past, and last week took suddenly and seriously sick. Dr. Wright diagnosed the case as appendicitis and Dr. Means, of Columbus, came down on Sunday and performed the operation, from which the suffering patient could not recover and died at noon on Monday.

The deceased was a young man 18 years old and was of much help to his father in the dairy business.

He often drove the route and was familiar with the homes of Logan and had many friends in town, to whom his death comes as a sad blow. His father and mother have the sympathy of the entire community.

The Fourth of July GIRL

By ROBERTUS LOVE
COPYRIGHT, 1907, BY ROBERTUS LOVE

A TRUCE to praise of patriot boys. With all their Independence noise!

Now is the time to celebrate
The American maiden up to date.
This nineteen-seven athletic girl
At strenuous outings takes a whirl.
The swiftest mount she boldly rides;
She wrestles with the Jersey tides;
She plays at golf and likes it, too,
And she can paddle her own canoe.
This picture, if you need the proof,
Will show you she can raise the roof
With pyrotechnic hullabaloo
As well as any boy can do.

LOGAN, A RAIL ROAD CENTER

The merging of the K. & M. and H. V. R. R. is said to be a good thing by the railroad men who know the workings of the through line system. In another column of this paper a report from the Columbus daily press, recites that the H. V. R. R. and K. & M. have consolidated, which surely means that Logan with her shops and railroad facilities will be made a division point between the river and the lakes. It is conjectured that there will be K. & M. through passenger service over the H. V. line, bringing four more passenger trains through Logan daily. Further it is said that the merging of the roads means that the repair work for the southern division of the entire system will be done at the Logan shops.

We note with considerable local pride that Harry Speaks, for many years a Hocking Co. telegraph operator, has risen in railroad circles and is now made general Supt. of the T. & O. C. and Z. & W. consolidation.

BIG TIME FOR LOGAN.

A complete separation between the Toledo and Ohio Central, Hocking Valley, Kanawha and Michigan and the Zanesville and Western was announced Tuesday, and a re-arrangement in two different organizations entirely independent of each other has been effected and will take effect July 1.

By this severance the Hocking Valley and the Kanawha and Michigan become one road, with headquarters in Columbus, and the T. & O. C. and the Z. & W. another road, with its offices in Toledo. There will be no community of interests between the two.

There will be a change in the government, some of the old management going to the T. & O. C. and its new acquisition, and others to the Hocking Valley and the K. & M. M. Monsarrat, formerly president of the four roads, becomes the president of the Hocking Valley and Kanawha combination. Charles T. Lewis becomes the president of the T. & O. C. and Z. & W., of which he was formerly vice president. M. S. Connors will remain with the Hocking Valley as general superintendent of that combination. H. E. Speaks, formerly superintendent of the Hocking Valley, becomes general superintendent of the T. & O. C. combination. H. B. Dunham will be the manager; H. Q.
